Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claims 1 and 6 are objected to because of the following informalities: While the claims specify a garnet structure which should be of the general formula $A_3B_5C_{12}$, Claims 1 and 6 appear to be misprinted to read $A_3B_{15}C_{12}$. Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shimizu et al (US 5998925).

Regarding claims 1-3, and 6-8 Shimizu discloses a light emitting diode with a phosphor which absorbs a part of light emitted by the light emitting components and emits light of wavelength different from that of the absorbed light. Shimizu discloses the phosphor being a YAG satisfying the formula of claims 1 and 6, see column 4 lines 10-15. Additionally, Shimizu discloses the light emitting diode emitting light with a wavelength from 400-450 nm, see figure 18C, and the emission of light in the 575-585 nm range, see figure 18A.

Art Unit: 2875

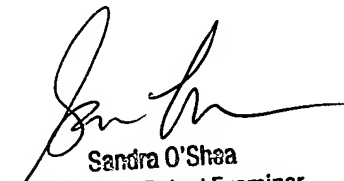

Regarding claims 5 and 9, the Applicant is claiming the product of claim 1, including a process of making the fluorescent powder. Claim 5 is a product-by-process claim, and thus it is the product and not the recited process that is afforded patentable weight. As such, no patentable weight has been given to the process recited in claim 5 (see MPEP 21 13).
